

What every student wants

The Assertive Teacher

Assertive discipline involves a certain way to teach and a certain way to approach subjects.

Students nowadays have different learning styles. They respond better to new models of discipline.

The Assertive Discipline Workshop

The participants will assess and learn the new role of a teacher in class management.

Through games and drama we will see the varied profiles of disruptive students and the most efficient ways to channel their energy, turning it into creativity and passion for learning.
