

**CALL REQUIREMENTS**

Call Title: Sustainable Batteries based on Semi-Solid Electrodes

Contact person: Edgar Ventosa

Department: Chemistry

Category:  Researcher

Others

Workday:  Full time

Part time

Aim: Continuous revision of the state of the art, design, execution and analysis of electrochemical experiments related to in-situ characterization of a new battery concept, supervision of students, dissemination of results through participation in international conferences and publications in leading journals, and intellectual property protection of the work performed

Requirements of the candidate: 1) Master Degree in Chemistry or Electrochemistry, 2) Knowledge of electrochemical fundamentals, 3) Knowledge in in-situ electrochemical techniques, 4) Knowledge in spectro-electrochemistry, 5) Experience in management and/or participation in multidisciplinary research teams of research projects.

Duration: 7 months

Gross monthly remuneration: 1500 Euros

Application submission deadline: June 13, 2022

Documents to be provided: Master Degree Certificate, Curriculum Vitae.
