

CALL REQUIREMENTS

Call Title: Sensors for the detection and / or monitoring of viruses, bacteria and serious diseases

Contact person: Alfredo Bol Arreba

Department: Chemistry

Category: Researcher

Others

Workday: Full time

Part time

Aim:

- To carry out research activities within the line of nanomaterials. The tasks will include, among others, laboratory tests for the evaluation of the toxic potential of different types of nanoparticles, through the cultivation and exposure of this nanoparticles to different commercial human cell lines and the implementation of different in vitro tests for the determination of cytotoxicity, as well as the analysis of the physicochemical properties of the nanomaterials.
- Register the work in accordance with the rules of the Research Groups.

Requirements of the candidate: Degree in Biology or Health Science. Master related with the research and Title in Clinical Diagnosis.

Duration: 6 months

Gross monthly remuneration: 1000 euros

Application submission deadline: Four business days from the day following the publication of this call on the Electronic Board of the University of Burgos

Documents to be provided:

- Identification document
- Curriculum Vitae, in free format
- Photocopy of university degrees
- Justification of the experience in research
