

CALL REQUIREMENTS

Call Title: Spectral Analysis of the Solar Radiation: Climatic, Biological and Energetic Applications

Contact person: CRISTINA ALONSO TRISTÁN

Department: ELECTROMECHANICAL ENGINEERING DEPARTMENT

Category: Researcher

Others

Workday: Full time

Part time

Aim: The objective of this contract is to perform the functions of support for the development of the project object of the contract, including

- Tasks of design, improvement and maintenance of meteorological facilities
- Calibration and tuning of new sensors
- Data processing and modelling using machine learning algorithms.
- Spatial representation of climatic and radiative variables through geographic information systems (QGIS, ArcGis)

Requirements of the candidate: Msc Engineering after 2019

Duration: September, 2022

Gross monthly remuneration: 800 euros

Application submission deadline: The deadline for submitting applications will be seven business days from the day following the publication of this call in the General Board of the University.

Documents to be provided:
