

**CALL REQUIREMENTS**

Call Title: **“SMALL MOLECULE TRANSMEMBRANE ANION CARRIERS FOR BIOLOGICAL APPLICATIONS”**

Contact person: Roberto Quesada Pato

Department: Chemistry

Category:  Researcher

Others

Workday:  Full time

Part time

Aims: • Research technician functions include, among others:

Collaboration in the synthesis of organic compounds and their characterization using spectroscopic techniques.

Preparation of lipid vesicles and conducting experiments to determine the transport activity of various organic compounds in these systems.

Management of scientific instrumentation such as electrodes and spectrophotometers

Requirements of the candidate: Professional Training (Higher degree, Chemistry).

Duration:

Gross monthly remuneration: 1400 euros

Application submission deadline: November 29, 2022

Documents to be provided: National ID or Passport, Curriculum Vitae in free format, Copy of the Degree and master titles
