

CURRICULUM VITAE

IMPORTANT – The Curriculum Vitae cannot exceed 4 pages. Instructions to fill this document are available in the website.

Part A. PERSONAL INFORMATION

CV date 12/05/2023

First name	ALBERT	
Family name	SERRÀ RAMOS	
Gender (*)	MALE	
e-mail	a.serra@ub.edu	
Open Researcher and Contributor ID (ORCID) (*)	0000-0003-0147-3400	

(*) Mandatory

A.1. Current position

Position	ASSISTANT PROFESSOR (<i>PROFESOR LECTOR</i>)	
Initial date	08/02/2021	
Institution	UNIVERSITY OF BARCELONA	
Department/Center	DEPARTMENT OF MATERIALS SCIENCE AND PHYSICAL CHEMISTRY	SCHOOL OF CHEMISTRY / UNIVERSITY OF BARCELONA
Country	SPAIN	Teleph. number
Key words	ELECTROCHEMISTRY, MATERIALS SCIENCE, HETEROGENEOUS CATALYSIS, NANOTECHNOLOGY.	

A.2. Previous positions (research activity interruptions, see call)

Period	Position/Institution/Country/Interruption cause
SEPTEMBER 2020 - FEBRUARY 2021	ADJUNCT PROFESSOR / UNIVERSITY OF BARCELONA / SPAIN / PROMOTION
JANUARY 2020 - SEPTEMBER 2020	SCIENTIST POSITION/SWISS FEDERAL LABORATORIES OF MATERIALS SCIENCE AND TECHNOLOGY / SWITZERLAND / RESIGNATION
JUNE 2018- DECEMBER 2019	MSCA POSTDOCTORAL FELLOWSHIP + POSTDOCTORAL POSITION / SWISS FEDERAL LABORATORIES OF MATERIALS SCIENCE AND TECHNOLOGY / SWITZERLAND / PROMOTION
NOVEMBER 2016 – JUNE 2017	POSTDOCTORAL POSITION / UNIVERSITY OF BARCELONA / SPAIN / COMPLETION OF THE PROJECT

A.3. Education

PhD, Licensed, Graduate	University/Country	Year
MASTER'S DEGREE IN UNIVERSITY TEACHING FOR NOVEL TEACHERS	UNIVERSITY OF BARCELONA/SPAIN	2023
BACHELOR'S DEGREE IN LAW	OPEN UNIVERSITY OF CATALONIA /SPAIN	2020
DOCTOR OF PHILOSOPHY (PH.D.) IN CHEMISTRY (CUM LAUDE - HONORS DISTINCTION)	UNIVERSITY OF BARCELONA/SPAIN	2016
MSC NANOSCIENCE AND NANOTECHNOLOGY	UNIVERSITY OF BARCELONA/SPAIN	2012
BACHELOR OF SCIENCE (B.S.) IN CHEMISTRY (HONORS DISTINCTION)	UNIVERSITY OF BARCELONA/SPAIN	2011

Part B. CV SUMMARY

I am currently an **assistant professor** in the Physical Chemistry section of the Department of Materials Science and Physical Chemistry at the **University of Barcelona** (February 2021–present).

I have a **doctorate in chemistry** (2016, excellent cum laude and Extraordinary Honors Prize), **master's in nanoscience and nanotechnology** (2012, CX fellowship), and **bachelor's in**

chemistry (2011, Extraordinary Honors Prize) from the University of Barcelona, as well as a graduate degree in law (2020) and a minor in intercultural education (2017) from the Universitat Oberta de Catalunya. My professional career has been developed primarily at the **University of Barcelona**, the **University of Newcastle**, and the **Swiss Federal Laboratories of Materials Science and Technology**. In recognition of my achievements, I was awarded the **Jóvenes Talentos** award from the electrochemistry group CIC energiGUNE in 2021, given to the best researcher under 35 years of age in the field of electrochemistry. I have published **49 research articles**, **8 review articles**, and **5 book chapters** and presented **58 oral communications or posters in international conferences**. I have also served as an editor of a special issue in Toxins: “Removal of Cyanobacteria and Cyanotoxins in Waters”. I have participated in **seven competitive research projects** at the national and/or international levels, including **one as the principal investigator**, **two as a principal co-investigator**, and **four as a member of the research team**. I maintain independently consolidated international collaborations with researchers in Switzerland, Malaysia, the United States, Mexico, Tunisia, Belgium, the United Kingdom, and Germany.

During this period, I have **codirected a doctoral thesis** by Dr. G. Shahnazarova titled Silica-Supported Multicomponent Materials for Environmental Remediation Biomedical and Energy Applications (UAB, 2023), and I am **currently codirecting two more theses** by Judit Lloreda (UB) and Laura Huidobro (UB). Additionally, I have (co-)directed **four master's theses**, namely by M. Garcia (2022, UB), R. Artal (2020, UB), G. Vázquez (2017, UB), and N. Gimeno (2016, UB), and I am currently co-directing another by A. Fons at UB. I have also (co-)directed **seven terminal-degree theses** by O. Servat (2022, UB), F. H. García (2022, UB), G. Santamaría (2022, UB), N. Bargues (2022, UB), A. Ramos (2021, UB), A. Fons (2021, UB), and A. Bembibre (2021, UB) and am currently directing two more by A. Brunat (2023, UB) and M. Ortiz (2023, UB).

My scientific career started with my master's and doctoral theses, which focused on **the development of new electrochemical strategies to synthesize micro- and nanostructured materials for various applications** in fields such as heterogeneous catalysis, electronics, and drug delivery. During my doctoral studies, I received an *Ajut a Personal Investigador en Formació* (APIF) from the University of Barcelona, a *Formació d'Investigadors* (FI) scholarship from the Generalitat de Catalunya, and a *Formación de Profesorado Universitario* (FPU) scholarship from the Ministry of Science, Innovation and Universities. Additionally, I had the opportunity to conduct research stays at the Institute of Advanced Chemistry of Catalonia and the University of Newcastle. After completing my doctoral thesis, I continued my research as a **postdoctoral researcher at the University of Barcelona**, where I **developed magnetic micro- and nanomaterials for applications in water decontamination, hydrogen production, and biomedical engineering**. In 2018, I joined the **Swiss Federal Laboratories of Materials Science and Technology** as a postdoctoral researcher, and in 2019, I was awarded a **Marie Skłodowska-Curie Fellowship** (grant agreement no. 754364) for the project titled “Development of Biomimetic ZnO-Based Photocatalysts for Water Decontamination.” In 2020, I won a **position as a scientist** at the Swiss Federal Laboratories of Materials Science and Technology in the electrochemistry group of the Laboratory of Materials Mechanics and Nanostructures. During my stay in Switzerland, I described various **electrochemical strategies to develop heterogeneous biomimetic photocatalysts for water decontamination and energy production processes** as well as nanorobotic platforms for controlled drug delivery. At the end of 2020, I resigned from the position and rejoined the University of Barcelona as a postdoctoral researcher and associate professor. In February 2021, I joined the Department of Materials Science and Physical Chemistry at the University of Barcelona as an **assistant professor** in the Physical Chemistry section. My main focus is improving water quality by developing hybrid photocatalysts that utilize sunlight, specifically doped or modified semiconductors manufactured via electrochemical deposition techniques (i.e., electrodeposition and electroless) and biotemplating strategies. Currently, I am codirecting two PhD students in these areas. The first student, Laura Huidobro, is developing biomimetic visible-light driven photocatalysts for water decontamination. The second student, Judit Lloreda (industrial doctorate- AGAUR), is working on the development of photothermocatalysts for hydrogen production in collaboration with *Consorci per la Gestió dels Residus del Vallès Oriental*. This partnership provides significant technological transfer and feasibility to the project. My future goals are focused on integrating the principles of green chemistry and circular chemistry to produce efficient heterogeneous catalysts for water decontamination and energy production. The goal is to create a holistic, green, and scalable process with zero waste. This process will utilize catalysts that can be easily recycled and will produce biofuels such as bioethanol, biodiesel, or pellets after they have reached the end of their effective life.
