- O Asia → €478 million.
- O Mercosur → €88 million.

What we offer:

<u>The goal</u> is to lead, from the interior of the vehicle, the change in the automotive industry. The company is developing smart and higher value-added systems, which provide further functions including technology, electronics, decorative surfaces and lighting solutions for its components.

Our client-focused approach is one of the company's three core values. This is what defines our worldwide implementation strategy and allows us to satisfy the ever-increasing demand of manufacturers to provide global platforms.

Our In-House engineers form part of our clients' work teams and work jointly to provide permanent technical support.
