

International Summer School & Sustainability Summer Programme

Thursday 30 June > Thursday 21 July 2022

Take the chance in the summer to study abroad on our accredited courses worth up to 15 ECTS/8 US credits, whether it's for credit transfer towards your degree, study something completely different to your normal course of study or even just a chance to interact with people from all over the world with similar interests from different perspectives.

Each course is worth up to 7.5 ECTS/4 US credits and is taught by our world-class faculty along with external experts in the field brought in to ensure understanding of the subject area from different angles and small class sizes to maximise the chance to engage with your classmates and the academic staff at each turn.

Our programme also includes an engaging social programme designed to help you meet and connect with new people from all over the world at a time when the world has seemed to have gotten smaller for a lot of us. Also within the programme is the chance to learn new skills and acquire knowledge to help you meet your future targets, including study skills and postgraduate study guidance and potential scholarships.

One of the greatest advantages of joining us for the International Summer School or the Sustainability Summer Programme is the chance to meet people from all over the world, get to know each and most importantly expand your knowledge and understanding of the world from many more perspectives. Our entire academic programme and social programme is geared towards ensuring you can make the most of the opportunity to explore each part of the world from the people around you.

Our on campus programme includes accommodation, several day trips and social programme as well our incredible academic courses.
