# Opponents of 'Global warming'

## Dissonance in the Issue

**Why?** Too many variables; long-term study; low consistency of results

- **Human activities:** Gases, agriculture, dams, deforestation, artificial forest fires, etc.
- **Nature:** Volcanoes, clouds, forest fires, glaciers, ozone layer, ocean currents, etc.
- **Cosmic climate:** Earth-sun interaction, solar activity etc.

## Questions to be solved

- **CO<sub>2</sub> –main factor in the greenhouse effect? Other gases?**
- **The Great Climatological change:**  
A rise of 7 degrees Celsius, 11,500 years ago for 50 years  
(Ice-core evidence of abrupt climate changes, Richard B. Alley, 2000).

# Climategate

- Also known as the Climate Research Unit e-mail controversy
- Internet leak of thousands of emails and other documents from the University of East Anglia's Climatic Research Unit (CRU).
- Emails and documents were obtained through the hacking of a server.
- Hacker had filtered them using keywords, including "Yamal", "tree rings", and "Phil Jones", so that these names appear in many of the documents

## Australia Passes 'World First' Google, Facebook Media Payment Law

BY DANIEL Y. TENG | February 24, 2021 Updated: February 24, 2021

The contentious "world-first" media payment law that spurred Facebook to censor news content in Australia will soon be in force after the Australian federal Parliament ratified it on Thursday.

The media payment law locks Google and Facebook into a framework where eligible news outlets in Australia, with a minimum revenue of \$150,000, can enter negotiations with the tech giants for payment of their content.
