INDUSTRY GUIDED VISITS

Tuesday, 25^h

LA ESTACIÓN DE LA CIENCIA Y LA TECNOLOGÍA – UNIVERSITY OF BURGOS

La Estación is a project that was born with a vocation: to promote scientific and technological culture among the citizens of Burgos and the entire community of Castilla y León in an emblematic place, the city's old train station.

For more than a century, this space witnessed the passage of thousands of trains and millions of people, who crossed its walls arriving or departing for their destination. Now, it is a mandatory stop for all those who are looking for answers to their concerns or simply want to have fun through science.

Thursday, 27^h

The vineyard is the origin of our wines. Bodegas Portia owns 160 hectares in the area of Roa, Gumiel de Izán, Villanueva and Gumiel del Mercado. At the heart of Ribera del Duero. The land is the essence, a land where our wines are born, wines with temperament and personality. They have an intense flavour profile and violet hues. In the mouth, they are unctuous and soft, the result of extreme weather with autumn and even spring frosts, and harsh, long winters.

Our terroirs include the exceptional vineyard, Finca La Encina, in Gumiel del Mercado, in the “Golden Triangle” of the Ribera del Duero. It is situated on a hillside in a perfect north-south arrangement, at a height of over 850 meters and devoted exclusively to the Tempranillo variety. Sustainable agriculture practices in this vineyard ensure the utmost respect for nature, allowing the soil itself to feed the grapevine

Portia is a winery designed by the famous and prestigious architectural studio Foster & Partners. A spectacular architectural project; a symbol of modernity and the future. A three-pointed star in the heart of Ribera del Duero.

Light, matter and soul; an architectural icon in the world of wine. Employing steel, wood, concrete and glass, its design combines the balance of materials and forms, of architecture and landscape, of earth and sky. Bodegas Portia, a symbol and a certainty.

Friday, 28^h

Hiperbaric-High Pressure Processing is the World leading manufacturer of High Pressure Processing (HPP) equipment for the food industry. From its very beginning, in 1999, Hiperbaric has been involved in the design, technological development, production and

commercialization of high pressure processing equipment.

Its reliability, customer support, team work and continuous innovation due to its strong R&D&I effort, are the ingredients for a world leading high tech company.

There are operative Hiperbaric High Pressure Processing equipment in food industries of Europe, North, south, and Central America, Asia, Africa and Oceania; processing meat products, fish and seafood, fruit and vegetables, juices and beverages, dairy and all types of ready to eat meals.

For more than a century, we have devoted our energy and our competencies solely to one business.
